

For synchronous tightening and loosening for all wrenching tasks required in track maintenance within ROBEL's ROMIS Mobile Maintenance Unit.

THE ADVANTAGES. YOUR BENEFITS.

Precise & efficient

- Data recording with patented wrenching software
- GPS data logger
- Torque repeatability from 3% (independent of joint hardness and rail fastener type)
- Uniformly high wrenching quality independent of operator

For further information and individual advice, please get in touch with your ROBEL contact.
