

## ROPOWER 70.02 Hybrid Drive Unit

### For powering:

- ROGRIND 13.49 E<sup>3</sup> Hybrid Rail Head Profile Grinding Machine

### THE ADVANTAGES. YOUR BENEFITS.

- ROBEL supercaps in the power pack allow for the storage of excess energy from grindstone idling and will release it again during load peaks.
- Oil level monitoring with automatic shut-off when low
- Especially smooth and low-vibration engine run

ROPOWER 70.02 – 5029900002

### SPECIFICATION

|              |                 |
|--------------|-----------------|
| Drive        | 4-stroke engine |
| Type         | Honda GX 200    |
| Output       | up to 7.0 kW    |
| Total weight | from 49.5 kg    |

### ACCESSORIES

- 5026930001 Discharging box  
for discharging the supercaps for maintenance

Discharging box – 5026930001

## ROPOWER 70.03 Power Supply

### As alternative drive for machines with brushless electric motor:

- ROCUT 13.90 E<sup>3</sup>
- ROGRIND 13.45MD E<sup>3</sup>
- ROGRIND 13.49 E<sup>3</sup>
- ROCONVERT 72.01 E<sup>3</sup>

ROPOWER 70.03 – 5039900003

### SPECIFICATION

|                            |                           |
|----------------------------|---------------------------|
| Input voltage              | 400 VAC* 50/60 Hz         |
| Input power                | 11 kW                     |
| Output power               | 10 kW                     |
| Weight from                | 18 kg                     |
| Length of connection cable | 5 m (CEE-32A safety plug) |

\*VAC = Volt a.c. current; \*VDC = Volt d.c. voltage
